PROFESSIONAL SUMMARY

Motivated Computer Science Engineering graduate with hands-on experience in **Java, Spring Boot, Servlets, JSP, JDBC, MySQL, RESTful APIs, and Flutter**. Strong foundation in **Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), and SQL**. Experienced in developing secure, database-driven web and mobile applications with CRUD operations and REST API integration. Seeking an opportunity as a **Java Backend Developer** to build scalable and efficient software solutions.

EDUCATION

B.Tech, Computer Science Engineering | Shri Vaishnav Institute of Information Technology, SVVV
CGPA: 7.75/10 | 2022–2026
Class XII: 77.7% | St. John's Higher Secondary School | 2020
Class X: 87.8% | St. John's Higher Secondary School | 2018

SKILLS

Programming Languages: Java, C, C++
Backend: Spring Boot, Servlets, JSP, JDBC, REST APIs
Frontend: HTML, CSS, JavaScript
Mobile: Flutter, Dart
Database: MySQL, SQL
Core Concepts: OOP, Data Structures & Algorithms, Collections Framework
Tools: Git, GitHub, Maven, VS Code, Eclipse, Android Studio

INTERNSHIP

Flutter Developer Intern
Evolve Infotech, Indore | Feb 2026 – May 2026

- Developed responsive cross-platform mobile applications using Flutter and Dart.
- Integrated RESTful APIs with Flutter applications and optimized app performance.
- Collaborated on UI development, testing, bug fixing, and reusable widget implementation.

PROJECTS

1. **SkillShareHub**
   Tech Stack: Java, Spring Boot, Flutter, Dart, HTML, CSS, JavaScript, MySQL, REST API
   Description:
   - Developed a full-stack SkillShareHub application for web and mobile platforms.
   - Implemented secure authentication, CRUD operations, and RESTful APIs.
   - Integrated MySQL database with responsive user interfaces.
   - Designed and optimized database schema to ensure efficient data storage and retrieval.

2. **Campus Crime Alert System**
   Tech Stack: Java, Servlets, JSP, JDBC, MySQL
   - Developed a web application for reporting and tracking campus security incidents.
   - Implemented role-based authentication and incident management modules.
   - Designed MySQL database and analytics dashboard for monitoring incidents.
   - Built responsive user interfaces using JSP, HTML, CSS, and JavaScript for improved user experience.

3. **Restaurant Inventory Management System**
   Tech Stack: Java, Servlets, JSP, JDBC, MySQL
   - Developed an inventory management system for tracking restaurant stock.
   - Implemented admin authentication and CRUD operations for inventory.
   - Built inventory reports and low-stock alert functionality.
   - Designed and managed MySQL database to maintain inventory records and transaction history.

CERTIFICATIONS

- Software Engineering Job Simulation – Skyscanner (Forage)
- Hands-on Training in C, C++ and Object-Oriented Programming – Universal Informatics
