LAKSHYA PATIDAR

B.Tech. - Computer Science & Engineering | +91-9644763955 | lakshyap68@gmail.com | Indore, Madhya Pradesh

LinkedIn: Lakshya Patidar | GitHub: Lakshya04Patidar

SUMMARY

Computer Science undergraduate with strong foundations in software development, programming, Data Structures & Algorithms, REST APIs, and system design. Experienced in developing full-stack and backend applications using Python, JavaScript, React.js, and Node.js, with practical exposure to authentication systems, API development, database integration, and system integration. Strong understanding of software development workflows, with experience in building maintainable applications, troubleshooting technical issues, and collaborating with teams to deliver reliable software solutions.

TECHNICAL SKILLS

Programming: C, C++, Python, JavaScript

Software Development: Software Development, Application Development, Backend Development, System Integration

Web Development: HTML, CSS, React.js, Node.js

Backend & APIs: REST APIs, API Development, Authentication Systems

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, System Design, Problem Solving

Database & Systems: DBMS, Operating Systems, Database Integration

Testing & Troubleshooting: Application Testing, Debugging, Troubleshooting, Validation

Version Control: Git, GitHub

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya | Bachelor of Technology (B.Tech), Computer Science & Engineering

CGPA: 7.12 / 10 | 2023 – 2027

Shri Devi Ahilya Shishu Vihar (CBSE) | Class XII (Senior Secondary) – 2023

Percentage: 56.2%

Shri Devi Ahilya Shishu Vihar (CBSE) | Class X (Secondary) – 2021

Percentage: 69.4%

PROJECTS

Face Liveness Detection System | Backend Development, Machine Learning, Frontend Development

- Designed and developed the backend architecture for a real-time face liveness detection system.
- Implemented ML-based verification workflows to support secure authentication and application functionality.
- Developed APIs and integrated system components to establish an end-to-end application workflow.
- Led a 4-member team, coordinating task distribution, API development, and system integration.
- Worked on integrating backend services with the frontend and machine learning components.
- Applied software development and problem-solving practices to build a reliable authentication workflow.

CERTIFICATIONS & ACHIEVEMENTS

Data Structures & Algorithms – Sigma 7.0 Batch, Apna College

- Completed structured training covering Arrays, Linked Lists, and Recursion.
- Strengthened problem-solving skills through regular coding practice and complexity analysis.

Web Development (MERN Stack) – Sigma 7.0 Batch, Apna College

- Built responsive web applications using REST APIs, authentication mechanisms, and database integration.
- Developed full-stack applications using MongoDB, Express.js, React.js, and Node.js.
- Completed multiple coding challenges and technical milestones.
